Sir:

In response to the Office Action mailed 01/24/2008, please amend the above-identified application as follows:

In the Specification:

As requested by the Examiner, applicant is submitting a substitute specification. Said substitute specification is the English translation of the PCT (already submitted to USPTO at the time of Entry into U.S. National Phase of the PCT application, and available at PAIR in USPTO website showing a stamp reading "10/558442, IAP16Rec'd PCT/PTO 28 NOV 2005), now amended to correct some errors in the translation from Spanish. Applicant is now submitting the substitute specification in two versions: a) a red-line version showing amendments (additions are underlined, deletions are bracketed), and; b) a clean version. Namely, amendments are essentially as follow:

- the word "spiral" is replaced with "turn" since the former is not a correct translation of the Spanish term "espira" (page/line 1/21-22, 2/25, 2/29, 4/18, 4/23, 4/28, 4/33, 5/7, 5/12, 5/34 and 6/2).
